**A representative example**

A loan of 10 000 pesos is issued for 61 days with the extension of the contract. In 365 days below the contract rate is 1% per day (annual rate, respectively, will be equal to 365%). The total interest for this year is 36 500 pesos. ( $10,000 * 365\% = 36,500$ ), for 1 day 100 pesos ( $36,500 / 365 = 100$ ), for 61 consecutive days, 6,100 pesos ( $100 * 61 = 6,100$ ). The total amount of payment is 16,100 pesos. (The main debt in the amount of 10,000 pesos + 6,100 pesos.).
